

After 40 Years in Business We **KNOW** What Our Customers Want!

THEY WANT:

- ⚡ A free quote that includes all the details of the work needing to be done, delivered soon after they make their enquiry.
- ⚡ Electricians to arrive at the time arranged, wearing a clean uniform. They need to tidy up after themselves, be communicative and polite, and trustworthy.
- ⚡ The work to be well organised so the electrician arrives with everything needed to get the job done in one visit, unless it's a multi-day job.
- ⚡ To be kept informed of progress along the way.
- ⚡ The final bill to reflect the quote and not have additional items that were not explained or budgeted for.

McArthur & Symons are locally owned and managed, are registered Master Electricians and employ only trained and qualified staff. You can count on us!

Dunedin Electricians **YOU** Can Count On!

Whether you need . . .

- ⚡ A new power plug or your whole house rewired...
- ⚡ A new switchboard or a new kitchen...
- ⚡ An appliance mended or industrial machinery refitted . . .

McArthur & Symons are the company you can count on to do the job quickly, efficiently, reliably and courteously.

For all your electrical work

WHY YOU SHOULD REWIRE YOUR HOME

An older house with an out-of-date electrical system is dangerous! Many house fires are caused by faulty electrics.

When selling, a modern electrical system will make it easier as house insurance is often difficult to get without it.

Locally owned master electricians, McArthur & Symons are the people for the job. Experienced and appropriately qualified, they will rewire your home quickly and safely.

Customer Karen Jacquard says:

McArthur & Symons rewired my whole house and upgraded the switchboard. They also repositioned switches and installed new plugs. They worked for a week and were very communicative about when they would be at my house. They were tidy and trustworthy, and I would totally recommend them.

WHEN IT COMES TO RENOVATIONS AND ALTERATIONS, MCARTHUR & SYMONS HAVE YOU COVERED

House renovations or alterations require electrical work such as wiring, appliance installation or new power sockets.

This is complex work so you need a company with a strong track record and a solid reputation for reliability and good workmanship.

McArthur & Symons provide highly detailed quotes before work begins to avoid unpleasant surprises.

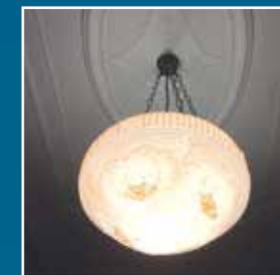

Customer Chris Bloore says:

Our cavity brick house was built in the 1920s. We chose McArthur & Symons to carry out all the electrical work involved in renovating the kitchen as they had done a great job of rewiring our previous house. They handled the challenge of cutting chases in the brick walls with a minimum of mess and co-operated well with the kitchen installers. They were a pleasure to work with, and we continue to use them for other electrical work.

UPGRADING AND UPDATING YOUR HISTORIC HOME

When upgrading a historic home you want it to be in keeping with its period. For example, you don't want plastic light switches on aged wood. Details like this make the difference between an average upgrade and a great one. A quality job adds value to your home.

Customer Sue Whittaker says:

McArthur & Symons quickly understood what we wanted in the review of our historic house lighting and were capable and knowledgeable in coming up with solutions to issues. We especially appreciated their identifying and remedying potentially unsafe fittings.
