

Are Foot Problems Wrecking Your Life?

Foot problems can wreck your life by stopping you from working and doing the things you enjoy. In rare cases they can even be life threatening.

Fit Feet Podiatry tackles all kinds of foot and ankle problems. We also offer treatment for problems the feet cause elsewhere, like bad backs that get worse when walking or standing, or knees that hurt on hills and stairs.

What Makes Us Different

Here at Fit Feet Podiatry we take foot problems seriously; so seriously that we employ only the most experienced and knowledgeable staff, and use only the most up-to-date diagnostic equipment.

As well as giving you the relief from pain that podiatrists are renowned for, we believe in seeking the cause of your problems and offering a treatment plan aimed at longer term relief, and even a cure where possible. This can not only make you feel better, but often saves you money on return visits.

Despite the exceptional quality of our service, our fees are comparable to other providers.

We Can Help Clients Who Have:

- Injuries and musculo-skeletal problems: Sprains and strains, heel and arch pain, knee, ankle and hip pain, flat and high arches, shin or bunion pain, sciatic and lower back pain, achilles problems, foot joint pain.
- Skin and nail problems: Calluses, corns, ingrown or thickened nails, verrucae, fungal infections.
- Diabetes: preventative maintenance and ulcers.
- Childhood foot ailments: In-toeing, flat arches, toe walking, verrucae, Sever's disease and developmental problems.
- All health problems originating from the feet.

- ACC registered
- Accredited by the NZ Academy of Sport

With our state-of-the art equipment we can help all foot problems—big and small.
